When NTP comes back can we get about 150 ul of it and also the conc of pfas in it? that way we can test the water in vitro and also make a mixture of just pfas to see if the pfas explains the bioactivity.? This is what we are doing with Tom Speth and having another water source would be great!

we have concentrated water from the Chemours outfall. We also have 10 L of the original Chemours outfall that is not concentrated yet. Could get fresh stuff too if needed.

Hey we are finally going to run the in vitro study at ntp. Do you have any conc cape fear water sitting around? We have some conc water from Tom Speth out of Cinn. It would be great to collaborate on this
